

Documentation of Nursing activities in the operating room

- it is all about patient safety

Susanne Friis Soendergaard Ph.D. student
Aarhus University - Denmark

Supervisors: **K. Frederiksen** Associated professor Ph.D. Section of Nursing Science Aarhus University.

V. Lorentzen Clinical Associated professor Ph.D Center for Nursing Research - Viborg

E. E. Sorensen Associated professor Ph.D Research Unit for Clinical Nursing Aalborg University Hospital. Department of clinical Medicine ; Aalborg University

This is the result from an ethnographic inspired baseline study, which is the first part of a Ph.D. project. The aim of the baseline study is to investigate the context and the underlying mechanism for documentation of perioperative nursing activities in the operating room.

Context and mechanisms which influence patient safety

How does the nurse prioritize?

Administration

Culture

Patient care

Teamwork

Technology and
Documentation

Technic and
instrumentation
