Editor’s Note

These proceedings have been organized in two folders: IGD and MSEC10. In these folders the information is organized in the same way: There is a document with the different abstracts and two folders with the additional information, one of this with the full text of Plenary Lectures and the other one with the full texts of different contributions.

The exact material in all documents contains the versions that the different authors have given us according to the rules established by the organization in the official web page.

The order of the contributions follows the Official Programme, according to the different Parallel Sessions.

We want to thank the KeyNote Speakers and the rest of the authors their contributions to this workshop.

Salamanca, 9th September 2010.
